ELECTRONIC CIGARETTE KIT

🇬🇧 USER MANUAL

Congratulations on purchasing your  
Totally Wicked Switz2 Electronic Cigarette Kit

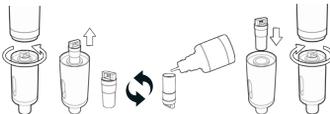

## The Totally Wicked Switz2

### Using your Switz2

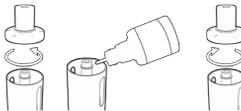

#### Priming the Atomizer Head:

Turn the Switz2 kit upside down so the mouthpiece points downwards. Unscrew and remove the battery from the tank. Grip the atomizer head by its connector and remove it from the tank by pulling. Prime the atomizer head by dripping a few drops of E-liquid into the central hole of the atomizer head. After priming the atomizer head, insert it back into the tank and screw the battery back on.

#### Filling the Tank:

Unscrew the top cap from the tank. Fill the tank to the top of the e-liquid viewing window, **avoiding filling down the central airflow hole**. Once filled, screw the top cap back on.

**Note:** After priming a new atomizer head and filling the tank, it is recommended to wait 5 minutes to ensure the atomizer head is fully saturated.

(1)

#### Powering On And Off:

To turn the Switz2 on, press the power button five times in quick succession, the indicator light will flash purple three times to show the Switz2 has been switched on. Similarly, if the Switz2 is already turned on, press the power button five times in quick succession to turn the Switz2 off, the indicator light will flash purple three times.

#### Vaping:

Press and hold the power button as you inhale the vapour, the indicator light will illuminate while the power button is held down to vape.

#### E-liquid Viewing Windows:

The Switz2 tank has three E-liquid viewing windows, these enable you to see at a glance how much e-liquid is left in the tank. Ensure the E-liquid level does not go lower than the bottom of the viewing window to prevent the atomizer head from becoming dry and burning prematurely.

#### Charging The Battery:

The Switz2 is recharged by inserting the charge lead into the charge port located to the right of the power button. The indicator light will flash three times when the charge lead is first connected, the indicator light will illuminate red and remain on while charging. Once fully charged, the indicator light will turn off completely.

#### Installing/Replacing an Atomizer Head:

To install a new atomizer head follow the process shown in the "Priming the atomizer head" instructions above.

**Reminder:** After priming a new atomizer head and filling the tank with e-liquid, it is recommended to wait 5 minutes to ensure the atomizer head is fully saturated with e-liquid.

#### Battery Life Indication:

As the level of battery charge changes, the indicator light will change colour to represent the amount of remaining battery life.

ELECTRONIC CIGARETTE KIT

 USER MANUAL

When battery charge remaining is above 30% the indicator light will glow blue when the power button is pressed.

When battery charge is between 6% and 30% the indicator light will glow purple when the power button is pressed.

If battery charge drops below 6% the indicator light will glow red when the power button is pressed.

When the battery is completely exhausted the indicator light will flash red 8 times and the device will go into sleep mode until it is recharged.

### Short Circuit Protection:

If an atomizer short circuit occurs the indicator light will glow red and flash five times in succession whenever the power button is pressed. If an atomizer short circuit error occurs, replacing the atomizer head should allow normal operation to resume.

### Atomizer Head Protection:

If the power button is held down for longer than ten seconds while vaping, the indicator light will flash eight times and the Switz2 will stop producing vapour.

### Kit Contents

- 1 x Switz2 Battery
- 1 x Switz2 Tank
- 1 x 1.5ohm SW2 Atomizer Head (fitted)
- 1 x 1.5ohm SW2 Atomizer Head (spare)
- 1 x USB Charge Lead
- 1 x User Manual

### Specifications

**Dimensions:** 16.5mm (diameter) 120.5 mm (length)

**Battery:** 800mAh Integrated Battery

**Max Charging Current:** 850mA

**Tank Capacity:** 1.8ml

**Atomizer Type:** SW2 Atomizer Heads

**Maximum Filling Nozzle Diameter:** 4mm

### Additional product information

There are no reported medical side effects with this product. If you believe you experience a side effect, please contact the manufacturer.

## Product Storage and Battery Precautions

- Store the Switz2 and its accessories away from children when not in use.
- Ensure the Switz2 is powered off when not in use.
- Avoid accidentally pressing the Switz2 power button when not in use.
- Please only use the charging cable provided.
- Please dispose of dead batteries in accordance with your country's appropriate legislation.
- Do not charge the batteries in a damp environment.
- Do not use the device when temperatures are outside the range of -10°C - 60°C.
- Do not charge the battery when temperatures are outside the range of 0°C - 45°C.
- Do not attempt to repair a faulty Switz2 as these are sealed units with no serviceable parts. Attempted repairs will void the warranty.

## Warranty

The Switz2 components have a 28 day parts warranty, with the exception of Atomizer Heads, which are consumable items and covered by a "dead on arrival" warranty only. The USB cable supplied has a 12-month warranty. If any parts are found to be faulty within this time please contact our customer service team, whose details are on the back page of this booklet and we will arrange for a replacement. We may require the goods to be returned for further investigation.
