ATOMIZER HEAD RANGE : WS/FL

VIDEO LINK Click [HERE](#) to review the video accompanying this information.

The WS range includes one of the best performing MTL atomizer heads that Totally Wicked currently provide, as well as a number of atomizer heads capable of using very high powers.

The FL atomizer heads have been sold by Totally Wicked for a number of years and the range is exclusively sub ohm and are capable of using very high powers. We currently do not provide any kits or tanks which are supplied with FL atomizer heads.

FL and WS atomizers are interchangeable in a number of kits and tanks we currently sell. A detailed breakdown of this is provided in the compatibility section of this document.

FEATURES AND BENEFITS

- The WS04 1.3ohm atomizer head provides an excellent MTL vaping experience, with limited airflow and an ideal power of 15 watts. This atomizer head is suitable for the majority of Totally Wicked customers.
- The WS01 0.2ohm atomizer head produces the largest amount of vapour of the range and is suitable for customers who prefer large amounts of vapour or who typically use tanks within the "ultra" category.
- The WS-M 0.27ohm atomizer head brings mesh technology to the WS atomizer range providing a better flavor representation when using higher powers.
- Working power range of between 7 and 130 watts..

COMPATIBILITY

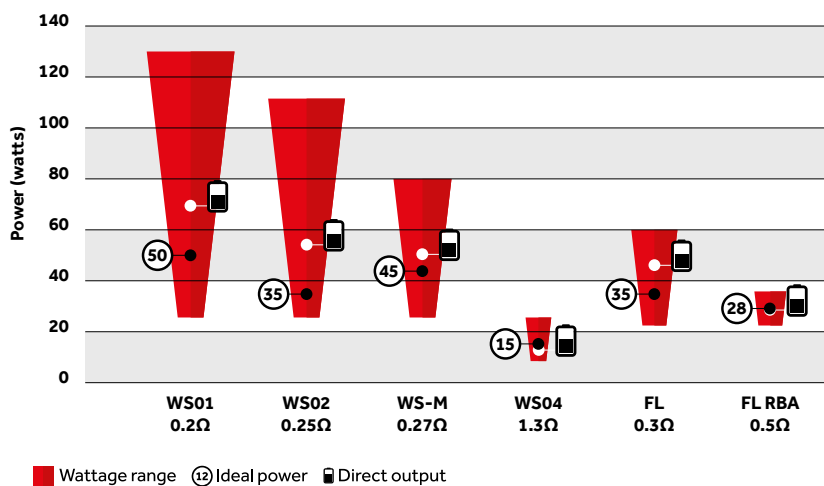

- Kanthal and Nickel-chrome atomizer heads are compatible with power, bypass, variable voltage and smart modes.
- Titanium and Nickel atomizer heads are only compatible with temperature controlled modes, not all kits can support this.
- The WS and FL atomizer heads are interchangeable on a number of products within the Totally Wicked range. The table overleaf displays the cross compatibility of these atomizer heads, tanks and kits.

WS / FL ATOMIZER HEADS

PRIMING

WS & FL atomizer heads are primed by dripping a few drops of e-liquid into the central hole.

After priming a new atomizer head and filling the tank, it is recommended to wait 5 minutes before vaping to ensure the atomizer head is fully saturated.
